

Invited to & participated in

International

US delegation of 16 adoption professionals. Made visits over 16 days to Russian orphanages and Russian universities to promote Russians adopting children from Russia. Russian families were not adopting Russian children. The project was very successful. Russians began adopting Russian children from orphanages!

Mathematica Policy Research created a white paper case study on Healthy Visions April 2019 through site visit, classroom observations and a review of program documents. This is important because the report was published with HHS Family & Youth Service Bureau. This publication is now available for others to model.

Please view the following achievements to understand Carole Adlard's involvement not only in the community but in the country.
